Brenda:

I started writing the new permit about 3 weeks ago, then got pulled-off into other directions. Thus, not much progress has been made and I'm afraid, given the summer season w/ vacations and my field schedule, that I won't be able to move on this until late August.

To answer some of your Qs:

We should leave the current monitoring in place until the new permit takes over. We can look at 1/4 monitoring via the new permit. I'll have to check into the Q about PTP "turning-over" ownership of the facility to the HOA.....not sure how this works?

Subject: Pineview Questions

Aaron,

I am meeting with Leon May and we have a couple questions for you.

- 1- Can we put the monitoring wells on a quarterly sampling schedule even before the new permit is in place? If so, is there a process we should go through?
- 2- Can I help expedite the new permit? PTP is at the last steps of turning the project over to the homeowners association and they would like the new permit to be in place prior to the transition.
- 3- Is there any special paperwork required by EPA for the ownership transition to the HOA? Can you send the paperwork, if there is any? Leon is going to ask Justin Clouser to prepare any paperwork for the transition, so you will be able to work with him also.

4- Are there any other issues you can think of for the transition or the new permit?

I hope all is well with you. I look forward to hearing from you.

Thank you,

Brenda Stein, P.E., M.B.A.
